

NEW V2.0 **MAVERICK™** **NEW V2.0**

A New Tool-From Some Old Friends

You know us. After copy protection began showing 1541 drive heads out of alignment, we got you Kracker Jax. When X-Man started his copy raids, we created the Kracker Jax file server. When the copy protector went unacknowledged, we responded with Fast & Easy and the Machet's Utility Kit. And when you decided to explore the myriads of computer-generated production schemes, we were there with Track & Tag Revolution.

Now the copy protection industry has copied the arms again. They've made it harder than ever to make legitimate backups of your sensitive software. So you think you should have to spend money to buy "authorized" backups of software that you already own?

Meet the 30-30

Introducing Maverick, the best weapon we've ever made to let you defend yourself from copy protection. Maverick is so advanced, it has actually replaced every other backup utility we've ever created. That's right: Maverick is now the ONLY utility software we manufacture for all our 1541 owners. We're making sure that Maverick remains the most powerful backup utility available - from ANY source! Take a look at some of these features:

- NEW!... 1541/1541/1541 has the copies - any direction
- GCR 8 copies for the experienced hacker
- All 8... GCR12... file expansion and file development
- Error scanner with unique sector editor
- Directory scanner with unique sector editor
- Works with C88, C128, C164, 1541, 1541/1541
- Scanning U.I., expansion with Drive Editor
- GCR128 with Program substitute removed available

- Single or dual state of the art Kracker
- 300 - parameters for those tough to back-up disks
- Capable of archiving 1541 disk protection
- Range of dual drive high speed data copies
- CALCULATIVE G-E-O-S... Menu... PARAMETER MENU & TOOLS
- NEW!... Dump's formatted parameter settings to printer
- High pattern scanner for high speed sectors
- Technical support from our staff experts

And this is just the beginning. Our future plans for Maverick include expanded RAMCARD support, RAM expansion module support, and even a 1541/1541/1541 release for support! And with our unique Subscriber Program, you can receive Maverick updates automatically - the easiest way yet!

You know us. We're the company that has worked hard for years to establish an excellent reputation for dynamic products. For price and superb customer support. We've always been a part of your life. And as long as you have your Commodore, we'll always be a part of your future.
